

How To Avoid Drift After the 20260312 State

Claude and MJC

March 12, 2026

1. Do not add new MCP tail grafs before the stabilized tail has been properly reviewed.
2. Do not treat claimed ablation numbers as settled reality without artifact verification.
3. Do not let Track U rhetoric substitute for theoretical yield.
4. Do not let Track C rhetoric substitute for reproducible totals.
5. Do not write explainers for ideas that have not yet stabilized enough to deserve one.
6. Do not use more papers to hide that a benchmark row is still missing.
7. Do not use more benchmark rows to hide that the theory boundary is still unclear.
8. Do not collapse count structure, tropical structure, and scoring policy into one undifferentiated object again.
